ANGEL

Version with the foot wash tap.
Ref. 52718

ANGEL

Its sober design and quality manufacture make this model a compelling option as an added extra for all pool types. **Ref. 52717**

NIAGARA SOLAR

Niagara Solar is a clear example of how to strike a balance between advanced design and sustainability. Niagara Solar uses solar energy to heat water kept in a water storage tank that is seamlessly integrated in the shower's main structure.

Ref. 53873

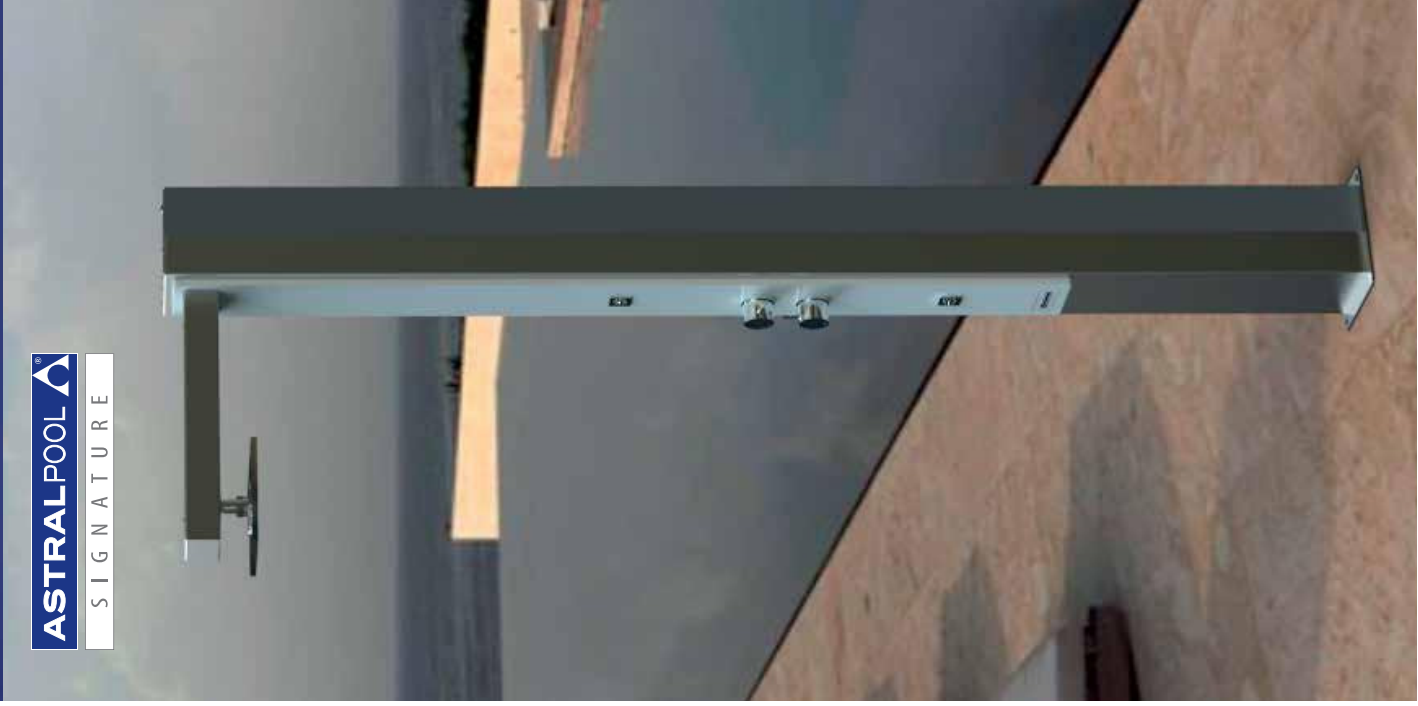

NIAGARA

This model is a good option for people who seek a balance of requirements between advanced design, pure lines and high quality. The shower can also be supplied to operate with a solar energy system. Ref. 53872

IGUAZU SOLAR

Design, quality and functionality come together with sustainability by integrating a 25-litre tank. The Iguazu solar shower also has two jets with a hydromassage function and large overhead spray. Ref. 56933

IGUAZU

Design, quality and functionality come together in this model, the last word in exclusiveness beyond anything else around. Its quality features include a nebuliser effect so you can shower under a refreshing mist of water as a separate option independent to the power shower. Ref. 53874
