- ✓ 20m or optional 30m cables

CALIDORAY UW POOL LIGHTS

To truly enhance the visual appearance of your pool, you require at least one light. This increases the flexibility to use the pool during the day and night, ideal for parties and outdoor activities.

Everyone loves to look at a crystal clear pool in their own back yard. But why limit the beauty of your new pool to day time only?

A Calidoray lighting system enhances the beauty of your pool during the night – so you double the viewing pleasure of your new investment.

CALIDORAY HALOGEN

A low cost but highly effective light for your swimming pool, each Calidoray Halogen light is supplied with 4 different coloured interchangeable lenses. So when the seasons change or your mood changes, simply change the coloured lenses to illuminate your pool in a totally different way. Models are available for concrete, vinyl liner and fiberglass pools.

CALIDORAY RGB

Calidoray RGB is a long life high output LED light. Each light has 4 programmed lighting sequences or you can select, white, red, green or blue as standard colours. The ability to illuminate your pool in different colours, fade from one to the next or select a disco mode when having a night time party sets the mood for your house and backyard.

One Calidoray light is usually suitable for 32 sq metres of pool area. Lap pools will usually require at least two lights so consult with your pool builder on the number of lights that best suit your application.

WARRANTY

Calidoray lights are covered by a 12 month warranty – go to www.astralpool.com.au for further details.
